

358 Color Wheel

Understanding the Copic Color System

The numbers and letters on your marker represent the following:

Intermediate Classification
Color number within color type
Variation 0-9

Broad Classification
Chooses color type

Specific Classification/ Brightness #
Specific variation of color within the intermediate classification.
Variation 0-9
Always in 1st or 2nd position.

BG05
Holiday Blue

Color Name

The color number system helps you choose colors that will blend nicely and give you depth in your color range.

How to pick blending colors:
To estimate how a color will blend evenly with the next darker or lighter shade, choose markers like this:

1. Match the color letters, keeping the color family the same.

2. Match the middle number; this will keep the tone the same.

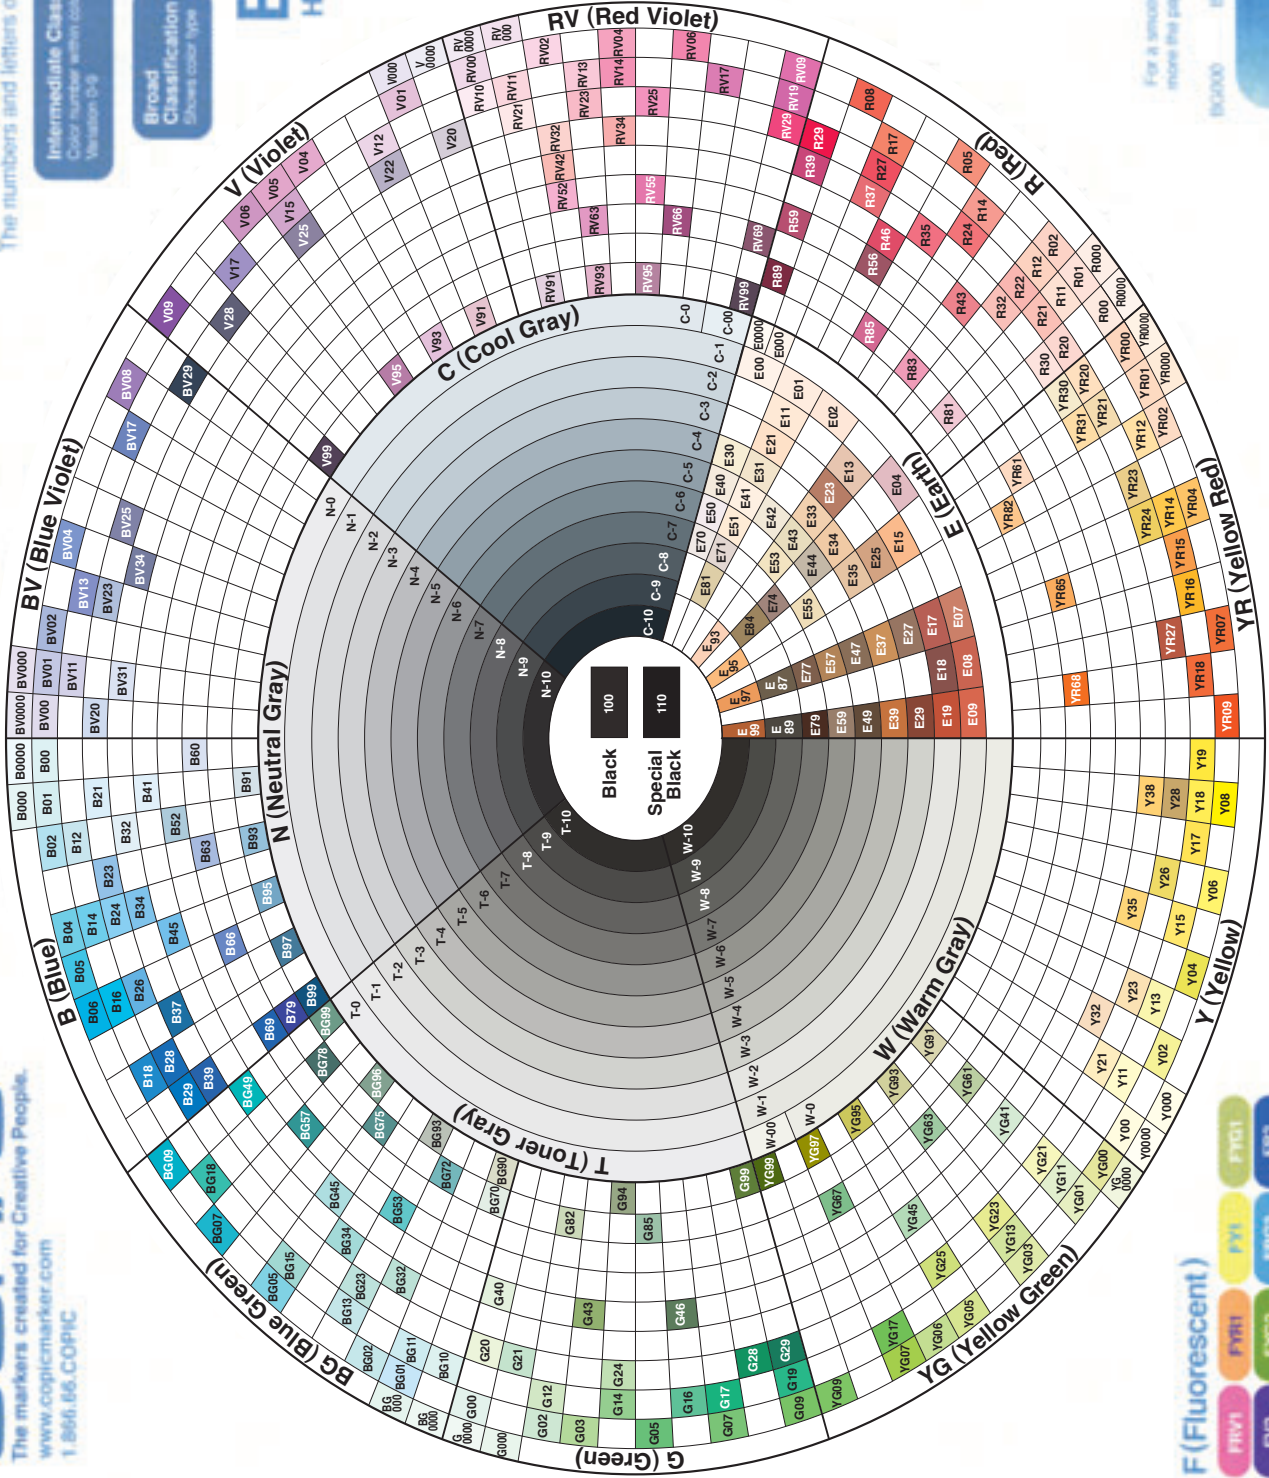

The last number tells you how light or dark the shade is. For tints, pick a last number with a value of 0, 1, 2, or 3. For Mid tones, choose numbers 4, 5, or 6. For Shadings, choose colors with the last number of 7, 8, or 9. Also try to keep a 2 or 3 digit difference between your colors.

Using more colors achieves smoother blends!

This blend was created with 3 markers.
BG000 BG005 BG010

For a smoother gradient, use more colors. Notice how much more the pale and dark shades stand out when blended with more colors.

Copic Color Charts

This list includes all 358 colors which are available with the COPIC system. The colors identified with ● are available as Ciao markers, the other colors identified with ■ are available as Copic markers.
